Contact numbers for each date will be available from species superintendents and will be posted at the veterinary inspection tent during the Fair. Animals should NOT be unloaded directly into the tie-out area before they are inspected by the state veterinarian on duty. Rams 6 months of age and over must be negative to an approved Brucella ovis test, or the flock of origin must have a negative B. ovis status. A negative B. ovis status is non-transferable from one flock to another for those animals which are sold. Unless sheep are a QR or RR genotype at codon 171 as verified by two blood tests drawn under the supervision of an accredited veterinarian or state or federal veterinarian, the CVI must include the following statement signed by the owner of the flock of origin: "The flock of origin had not been diagnosed as a scrapie infected, source, trace, or exposed flock in the last five years". For more information, see "Health Requirements" section.
 - * **In-state sheep** Sheep will be checked by the veterinarian as they enter the barns. No early releases. All sexually intact sheep must have an official scrapie tag.
